System Domain, Bengaluru, India

SUMMARY

DevOps Engineer with hands-on experience in building scalable cloud infrastructure and automation pipelines using AWS, Kubernetes, Docker, Terraform, and Ansible. Transitioned from operations and analytics background into DevOps through intensive bootcamp training. Experienced in CI/CD automation, Infrastructure as Code (IaC), and observability tools like Prometheus, Grafana. Currently preparing for AWS Certified Solutions Architect – Associate (expected September 2026). Focused on improving deployment efficiency, reliability, and system scalability.

EDUCATION

Panthéon SORBONNE

DevOps Engineer

JNNC Engineering, Karnataka India

Bachelor of Engineering, Industrial Production

PROJECTS

AWS WordPress Deployment

Terraform + Kubernetes + Helm

https://gitlab.com/datascientest-tarasamira/project_2025_app

- Deployed scalable WordPress + MySQL infrastructure using AWS EKS, Terraform, Docker, and Helm
- Built CI/CD pipelines with GitLab, Integrated Prometheus and Grafana for monitoring

Docker & API Testing Projekt

Docker & FastAPI

<https://github.com/Tarakadambi/Docker>

- Built Dockerized FastAPI applications
- Automated API authentication and testing using containers

GitLab CI/CD Automatisierung

<https://gitlab.com/tara.kadambi/magento-gitlab>

- Developed CI/CD pipelines for build, test, and deployment automation.

Ansible Automatisierung

Magento + MySQL

<https://github.com/Tarakadambi/Ansibleexam>

- Automated infrastructure provisioning using Ansible roles.
- Validated deployments using Molecule and Testinfra.

Infrastructure as Code (AWS)

- Provisioned AWS infrastructure (EC2, RDS, VPC, ALB) using Terraform.
- Automated WordPress deployment scripts

Jenkins CI/CD Automation

- Created CI/CD pipelines with approval gates for production deployments

Monitoring & Observability

- Implemented Prometheus, Grafana for system monitoring and alerting.

DATA ANALYTICS PROJECTS

Python EDA Analysis

https://github.com/Tarakadambi/Python_Festival

Festival Sales Analysis:

- Analyse und Visualisierung von Verkaufsdaten mit Python
- Identifikation von Kunden- und Umsatzrends

https://github.com/Tarakadambi/Python_StudentAnalysis

Student Performance Analysis:

- Analyse von Studentendaten zur Erkennung von Leistungs- und Verhaltensmustern.

Wine Datasets Analysis (https://github.com/Tarakadambi/Python_wine-Datasets)

Power BI Dashboards

<https://github.com/Tarakadambi/PowerBI-BankChurn>

- Bank churn analysis dashboard
- Financial KPI dashboards (<https://github.com/Tarakadambi/Financial-Power-BI>)

EXPERIENCE

Relocation to Munich June 2018. Munich

- Munich
- Integration Course - 2019 to 2022
- B2 German - 2023-2024
- DevOps Bootcamp - 2025

Operations Analyst

Indian Bank, Singapur • Singapur

Assisted in developing SOPs to ensure operational consistency, acted as liaison between departments for effective communication, analysed operational data to identify trends/issues and resolved customer inquiries and complaints promptly.

Admin (Operations)

Prosper Coal and Energy Pte Ltd, Singapur • Singapur

- Managed administrative support tasks in a dynamic workplace environment

Customer Support Executive

RiverVale Walk RC , Singapur • Singapur

Delivered exceptional customer service within deadlines, leveraged analytical and problem-solving skills to resolve operational challenges, and built strong communication skills while organizing team events.

Customer Support Assistant

ICICI Bank , Singapur • Singapur

Responded to client inquiries by providing technical support and managing high-volume tickets, while streamlining communications with Mumbai HQ to improve response times

LANGUAGES
